

Low Profile Mag Mount Antenna

05/05/2016 v2

- Rugged low profile design
- Covers global cellular / LTE bands
- Removable magnetic mount

The Panorama LPBEM-7-27 is a range of low cost high performance magnetic mount antennas for temporary fit applications. At only 95mm (3.7") high and protected by a robust high impact radome the antenna is almost impervious to daily wear and tear.

The LPBEM offers excellent performance across a wide bandwidth. The LPBEM-7-27 covers global cellular and LTE frequencies from 698-960 MHz and 1710-3800MHz making it an extremely versatile product. Although intended for magnetic mounting on a conductive ground plane the antenna can also be used for desk mounting applications with some impact on performance.

Supplied with a convenient 2m (6') length of flexible RG174 cable the LPBEM is easy to install and compatible with a large range of modems.

Technical Drawing

LPBEM-7-27-2F shown

Typical VSWR*

*Red VSWR measured with no ground plane with with 2m (6'6") of RG174 cable.
 *Green VSWR measured on a 400x400mm (16x16") ground plane with with 2m (6'6") of RG174 cable.
 *Blue VSWR measured on SP5-0470 mounting bracket with with 2m (6'6") of RG174 cable.
